# Wastewater Service Tariff

This Wastewater Service Tariff sets forth Regulations and Rates under which wastewater service will be supplied to its Customers by the Easton Utilities Commission, in three parts as follows:

I. GENERAL

II. TERMS AND CONDITIONS

III. RATES & CHARGES

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

## **PART I. GENERAL**

### **1. Definitions**

"Commission" - The Easton Utilities Commission of Easton, Maryland.

"Customer" - The owner or owners of the property served with wastewater, whether occupied by such owner or not.

### **2. Filing and Posting**

A copy of the Tariff is filed with the Clerk of the Town of Easton and copies are available for inspection in the Commission's Customer Service Center.

### **3. Application to Contracts**

The Tariff is a part of every Contract for Service. The benefits and obligations of the Contract inure to and are binding upon the successors, personal representatives and assigns of the parties thereto for the full term of the contract. The Contract shall not be assigned by the Customer without prior written consent of the Commission. Whether or not a written contract is executed, the applicant, by accepting wastewater service, is bound by the applicable rate schedule and these Terms and Conditions as they may be amended from time to time.

### **4. Revision**

This Tariff may be changed or revised from time to time in accordance with the Provision of the Charter of the Town of Easton. All Contracts are subject to such changes or revisions.

### **5. Interpretation**

The interpretation of the Tariff as to its intent and applicabilities will be made by the President and/or CEO, subject to the approval of the Commission.

### **6. Reservations**

The failure of the Commission to enforce any of the provisions of this Tariff shall not be deemed a waiver of its right to do so.

### **7. Commission's Disclaimer of Liability**

The Commission shall be liable for loss, cost, damage or expense to any person or property only if such loss, cost, damage or expense is the direct result of gross negligence or willful misconduct of the Commission, its agents, servants and employees; provided, however, that the Commission shall not be responsible for any loss, cost, damage or expense to any person or property unless, within ninety days of the act or injury, actual written notice of such act or injury and the circumstances under which it occurred is given to the Secretary of the Commission at its Office in Easton, Maryland.

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

## **PART II. TERMS AND CONDITIONS**

### **1. Application for Service**

Written application for service shall be made through the Customer Service Center of the Commission and such application when approved and accepted by the Commission shall constitute a Contract between the Commission and the applicant. The application for service shall clearly outline the class and type of use to be made of the service.

### **2. Single Point of Delivery**

#### a) General

In all future installations or re-installations of wastewater laterals the location of the laterals and the design of the wastewater system will be determined by the Commission.

Where more than one property is now supplied through one lateral pipe, any violation of the rules of the Commission by either or any of the Customers so served shall be deemed a violation as to all, and the Commission may take such action as could be taken against a single customer, except that such actions shall not be taken until the innocent consumer, who is not in violation of the Commission's rules, has been given a reasonable opportunity to attach his pipe to a separate wastewater lateral. Where one wastewater lateral has been used for two or more properties held in one ownership, and there be a division of such ownership, whether by sale or otherwise, each property will, thereafter, be required to have its own wastewater lateral, as part of the subdivision procedure, at the expense of the subdivider.

#### b) Multiple Units:

Structures having more than one residential or nonresidential unit may have a separate lateral for each unit or a combined lateral for each structure or cluster of structures. The number and location of the laterals and the design of the wastewater service system is subject to the approval of the Commission. Rates and charges for service to multiple units will be as indicated in Part III.

### **3. Refusal or Discontinuance of Supply**

Upon the Customer's failure to comply with any of the provisions of the Tariff, or to pay for service within fifteen days after the date bill is mailed or presented, or if such customer should discharge an effluent which would adversely affect the operation of the Wastewater System, the Commission may refuse or discontinue service without being liable to the Customer for any loss, cost, damage or expense occasioned by such refusal or discontinuance.

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

#### **4. Reconnection Expense**

Should it be necessary on account of non-payment of bills or non-compliance with the rules and regulations of the Commission to disconnect the service of the Customer, the Customer shall be liable for the entire expense of disconnection and reconnection payable in advance.

#### **5. Continuity of Supply**

The Commission shall not be liable for any loss, damage or expense to any Customer occasioned or caused by the presence of a wastewater connection, or by any interruption of the Wastewater Service, if such failure or interruption shall be due to storm, flood, fire, strike or any cause beyond the control of the Commission, or any cause except willful default or neglect on its part.

#### **6. Condition of Use**

The Commission will undertake to furnish service to the Customer for use only for his own purposes and only on the premises occupied, through ownership or lease by the Customer, who shall be one individual, firm, corporation or association. The service may not be extended by the Customer for resale to another or others. Charges for service shall be rendered in the name of the property owner.

#### **7. Use for Less than One Year**

The Customer shall pay all costs of connection and disconnection, and for main and wastewater lateral connections, and installation if service is used for less than one year.

#### **8. Customer's Installation**

All piping and appurtenances upon the Customer's premises must comply with and be installed and maintained in accordance with the requirements of the Town of Easton Plumbing Code; the Plumbing Code of the State of Maryland; the Local Inspection Authorities and the rules of the Commission. There shall be placed in the lateral, immediately before entering the walls of the building supplied a clean out connection so located as to clean the lateral from the building supplied to the wastewater main.

An auxiliary water meter to measure water that is diverted from the Wastewater System will be furnished and installed by the Commission at the request and expense of the applicant, including the capital charge for a water meter. The meter shall be placed in a readily accessible location for reading and maintenance. The piping connecting the Water System with any device the effluent of which is diverted to a drain other than the Wastewater System shall be in plain sight to enable the Commission to determine if other connections are made and if a reduction in the wastewater service bill is appropriate.

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

### **9. Service Connection**

Service connection will be made, and wastewater service will be furnished, upon approval by the Commission of the written application of the prospective Customer.

All connections to its mains, and the installation of the wastewater lateral from the main to the property or right-of-way line will be made by the Commission or subject to its inspection and approval. The design of the wastewater system and the location of the lateral will be determined by the Commission. Access to Customer's Premises

### **10. Access to Customer's Premises**

The Commission shall have free access to and right-of-way for the piping, and appurtenances on the Customer's premises, used for the service. Permission is given the Commission to enter the Customer's premises at all times, for the purpose of inspecting, reading meters and keeping in repair or removing any or all of its apparatus used in the wastewater service, and for said purpose the Customer authorizes the Commission to enter said premises. Where disconnection of the service is necessary for any reason and permission to enter the premises for the purpose of disconnecting is refused, the disconnection shall be made from the outside of the premises, and the Customer shall pay the Commission the costs in connection therewith, as a condition of resuming the service, in addition to the cost of reconnection. Should the Customer relocate and desire service this disconnection charge shall first be paid by him to the Commission.

### **11. Customer's Liability**

The Customer shall be responsible for all expenses involved in removing obstructions in the lateral connection or wastewater lateral from the main to the building served or in replacing any pipe or fittings damaged by the Customer (or his properly authorized agent).

The Customer shall be responsible for all charges for Wastewater Service (based upon water use) furnished under agreement until the end of the term thereof and for such further time as he may continue to take service; except that where the Customer has the right to terminate the agreement by notice, which shall be in writing, he shall remain liable for all charges for a period not to exceed ten days thereafter.

Where the water meter fails to register the total amount of water used, the Customer shall pay for such period an estimated amount based upon the average consumption in similar periods.

The Customer shall at once notify the Commission of any injury to, or of any cessation in registration of the water meter as soon as he is aware of it.

All leaks or stoppages in or damaged wastewater laterals from the main to the property line and in and upon, the premises supplied shall be promptly repaired. On failure to make such repairs with reasonable dispatch the Commission may sever the connection and it will not

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

be reconnected until all proper and necessary expenses incurred in disconnection and reconnection of the wastewater service are paid in full.

Repairs between the curb lines of the streets shall be made by the Commission or under its supervision and will be at the expense of the Customer, except in cases where there has been structural damage beyond the means of the customer to prevent.

The Customer shall be responsible for the maintenance of, and any damage done to the wastewater lateral. The Customer shall, at all times, comply with State and local regulations in reference thereto and shall make any changes thereto required on account of a change in regulations.

No rebate or discount shall be allowed upon any bill by reason of property becoming vacant, unless the owner of said property shall give notice thereof to the Commission previous to the same becoming vacant.

The Commission will not make adjustments to the Customer's bills when wastage of water occurs as a result of the Customer's negligence, or carelessness in maintaining any piping or fixtures upon his premises.

## **12. Method of Computing Wastewater Service Bills**

If water is supplied from the Commission's Water System, the number of gallons charged for in computing the Wastewater bill shall be determined from the reading of the water meter supplying the Customer.

If water is supplied from other than the Commission's Water System, the Commission shall install a meter at the appropriate metering point, at the total cost to the Customer.

When a leak occurs underground and without the knowledge of the Customer the Commission will adjust the bill as follows: the Customer shall pay for such period an estimated amount based upon consumption of water in similar periods.

## **13. Meters and Metering**

In case of a disputed account involving the accuracy of a meter, such meter shall be tested, upon the request of the Customer, in conformity with guidelines and procedures established by the Public Service Commission of Maryland or the American Water Works Association. In the event of the meter so tested is found to have an error in registration of 4 percent or more, the bills will be increased or decreased accordingly.

## **14. Returned Checks**

Checks given in payment for wastewater service and all other services provided by the Commission, which are returned unpaid by the Customer's bank, will result in an additional charge of twenty-five dollars (\$25.00) per check, per occurrence, which charge shall be levied against the Customer's account.

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

**15. Late Payment Charge**

All bills are due and payable when rendered and the late payment charge does not apply when the bills are paid within 15 days after date of rendition. If bills are not paid within fifteen days after rendition, a late payment charge will be added equal to 1.5% of the unpaid bill at the end of the first monthly billing period, after that an additional charge of 1.5% of any portion of the original amount which remains unpaid, and at the end of the second billing period an additional charge will be made equal to 2% of any portion of the original amount which remains unpaid at that time; however, the total of such charges shall not exceed 5%.

**16. Extensions and Additions to the Commission's Facilities**

a) Wastewater System Extensions and Additions

The Commission will extend its Wastewater System only within the corporate limits of the Town of Easton.

1. Rights-of-Way: The applicant or applicants requesting a wastewater system extension shall furnish, without expense to the Commission, satisfactory rights-of-way necessary for the construction, maintenance and operation of the wastewater system extension, or shall agree to reimburse the Commission for expense incurred in the procurement of the necessary rights-of-way.
2. Survey and Map: The applicant or applicants will be required to furnish the Commission with a complete and final topographic map of the area being developed showing all roadways, alleys, lots, and locations of proposed buildings to be saved and the water requirements of each proposed building or structure. All surveys shall be carefully and accurately executed and shall be made with an accuracy of no less than one to five thousand.

All final surveys, maps and plans shall be made by a competent Civil Engineer or Land Surveyor registered by the Maryland Board of Registration for Professional Engineers and Land Surveyors. All maps shall be accurately drawn to scales suitable to the size of the tract but in no case shall the scale be more than fifty (50) feet to one (1) inch.

3. Design: The design, plans and specifications for all system extensions and additions will be prepared by or approved by the Commission prior to any construction. The design of a system extension within the applicant's subdivision or on his property may be done by the applicant or his agent when authorized or directed by the Commission. The design shall include all mains, fittings, manholes, laterals, pumping stations, force mains and such other appurtenances as may be required and will be located, where possible, in the public roadway rights-of-way. Prior to construction, any applicable permits must be obtained.
4. Construction: The extension of the system shall proceed in accordance with the approved plans and specifications for the project. The applicant will be fully responsible for the construction of the extension to his property or within his subdivision unless otherwise

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

5. previously determined by the Commission. All construction shall be inspected and approved by the Commission.
6. Costs: All cost associated with the extension including preparation of maps, surveys, construction plans, review and approvals, construction, inspection and testing shall be the responsibility of the applicant. If portions of the system extension are designed for future extension and service to other than the property or subdivision of the applicant the Commission may construct this portion and share in its cost. The Commission will determine its share of the cost prior to authorizing construction. If the Commission is to construct the system extension or a portion thereof the applicant shall be required to pay to the Commission an amount of money equal to the estimated cost of his share of the system extension or portion thereof. Said sum of money shall be paid to the Commission prior to the start of construction. If the cost of the project or the applicant's share thereof exceeds the estimated cost, the applicant will be required to pay the additional amount to the Commission prior to any connection to the extension. If the cost of the project or the applicant's share thereof is less than the amount paid, the Commission will refund this amount which shall not bear interest to the applicant.
7. Ownership: In consideration of the Commission maintaining the system, all mains, appurtenances and facilities included in the system extension become the property of the Commission.

b) Service Installations

Where mains are available in the public thoroughfare opposite the Customer's premises, or extended thereto in accordance with the foregoing, the Commission will make service connections as described in Part II - Section No. 9.

c) Wastewater Treatment Facilities

The Commission will furnish all labor, material, equipment, supplies and structures required for the treatment of wastewater.

**17. Allocation of Capacity \***

- a) Temporary health, environmental or financial considerations may limit the Commission's ability to provide the service requested. To adhere to regulatory requirements and to prevent overloading of wastewater facilities, available capacity shall be allocated in accordance with the following:

1. The amount of available capacity shall be determined by the Commission by the following formula
- 2.

(Remaining Allocable Capacity)	=	(Gross Available Capacity)	-	(Allocated Capacity for New Customers)	-	(Allocated Capacity for Vacant Lots)
--------------------------------	---	----------------------------	---	--	---	--------------------------------------

Issued: December 17, 2004	Signed: Hugh E. Grunden
Effective: December 17, 2004	Title: President

Where:

The Remaining Allocable Capacity is the available treatment capacity for new customer connections.

The Gross Available Capacity is the amount determined annually by the Maryland Department of the Environment (generally the design capacity of the treatment facility less the average daily flow computed over the preceding two calendar years.)

The Allocated Capacity for New Customers is the estimated demand for new customers added to the system during the preceding and current calendar year.

The Allocated Capacity for Vacant Lots is the potential demand for service for legal lots of record which may be connected to the system.

3. Prior to allocating wastewater capacity, all Town of Easton plat approval requirements must be satisfied up to the point of requiring the Talbot County Health Officer's signature.
  4. The applicant shall request the allocation of wastewater treatment capacity required for the project. When the project is to be constructed on existing buildable lots, the allocation shall be made upon payment of applicable water and wastewater capital charges. When the project entails the creation of new lots, the wastewater allocation process shall begin upon issuance of a project specific approval letter by Easton Utilities to the Talbot County Health Officer who may then render an approval signature on the subdivision plat and subsequently return to the applicant for final approvals with the Town of Easton. Easton Utilities will reserve the capacity indicated in the allocation letter 45 calendar days, after which the allocation may be rescinded. Capital charges and all other applicable Town and/or Easton Utilities Commission charges, bonds, etc. shall be paid, and the final plat signed by the Town Engineer and forwarded to the Planning Commission Chairman for signature within the 45 calendar day period.
  5. No more than 10% of the Remaining Allocable Capacity will be allocated to all phases of the approved development, subdivision or project over a 12-month period..
  6. The amount of capacity required and allocated will be determined by the Commission based upon its records and experience. If requested, the applicant will provide additional information to assist the Commission with this determination.
- b) If an agency of the Federal or State Government imposes a moratorium on the connection of properties to the system, the Commission will, upon revocation of that moratorium, permit connections to the system in a manner consistent with the policy outlined in Section 16A.

\* As Amended by the Commission on April 7, 2003

Issued: December 17, 2004	Signed: Hugh E. Grunden
Effective: December 17, 2004	Title: President

**18. Wastewater Contribution Permits**

- a) In accordance with local, State, and Federal regulations, wastewater contribution permits shall be issued to commercial and/or industrial customers determined by the Commission to have a significant impact on the wastewater system. This permit shall specify the conditions under which the customer shall be allowed to discharge wastewater into the system.
- b) The Commission shall provide additional services for customers with such permits including, but not limited to administrative matters, one annual compliance test, and inspections of the customer's facilities.
- c) When additional costs are incurred due to the failure of the permittee to comply with the permit, the permittee shall bear all costs associated with the non-compliance.

Issued: January 10, 2002	Signed: Hugh E. Grunden
Effective: January 10, 2002	Title: President

## **PART III. RATES & CHARGES**

### **1. In-Town**

Available for all classes of service within an area bounded by the Corporate Limits of Easton.

#### **Capital Charges:**

##### Prior to July 1, 2004:

- a) Residential properties within the January 1, 1966 Corporate Limits: no charge for the first dwelling unit, \$2,100 per additional dwelling unit
- b) Residential properties beyond the January 1, 1966 Corporate Limits: \$2,100 per dwelling unit
- c) Non-Residential Connections:

The greater of \$2,100 or \$2,100 per Equivalent Dwelling Unit as determined by the Water Use Standards (Appendix 1) divided by 250 gallons per day

##### On or after July 1, 2004:

- a) Residential properties within the January 1, 1966 Corporate Limits: no charge for the first dwelling unit, \$4,700 per additional dwelling unit
- b) Residential properties beyond the January 1, 1966 Corporate Limits: \$4,700 per dwelling unit
- c) Non-Residential Connections:

The greater of \$4,700 or \$4,700 per Equivalent Dwelling Unit as determined by the Water Use Standards (Appendix 1) divided by 250 gallons per day

The appropriate capital charge or charges must be paid to obtain an allocation of available capacity. Capital charges must be paid in accordance with the following:

#### 1. Residential Subdivisions:

Capital charges for each lot to be served must be paid prior to the recording of the final subdivision plat among the Land Records of Talbot County.

#### 2. Commercial or Industrial Subdivisions:

The minimum capital charge for each lot to be served must be paid prior to the recording of the final subdivision plat among the land records of Talbot County. Additional capital

Issued: June 25, 2004	Signed: Hugh E. Grunden
Effective: July 1, 2004	Title: President

charges for larger than minimum meter size must be paid prior to the issuance of a building permit for any construction on the lot.

3. Individual Residential, Commercial or Industrial Lots or Parcels.

Capital charge for the lot or parcel to be served must be paid prior to the issuance of a building permit for any construction on the lot or parcel.

In no event will a water meter be installed and connected to the system extension prior to the payment of the appropriate capital charge.

Refunds Of Capital Charges

The Commission may, upon request and for good cause shown, refund all or a portion of a capital charge where it is demonstrated that the charge was inappropriate, unjust or not in conformity with the terms of this Tariff and applicable law. The Commission shall not consider a request for a refund unless the payment was made under protest and accompanied by a written statement as to why the amount charged was inappropriate, unjust or not in conformity with the terms of this Tariff and applicable law.

**Account Maintenance Charge:**

Effective January 1, 2005, applicable to all properties for which wastewater treatment capacity has been allocated but not used:

\$20.00 per quarter

**Connection Charge:**

Applicable to all Customers

Services of any size - \$25.00 per meter or per user served by a master meter

**Customer Service Charge:**

a) Residential:

Applicable to all installations

Effective July 1, 2004 \$15.00 per quarter per meter or per single family dwelling unit served by a master meter installation.

Effective July 1, 2005 \$18.00 per quarter per meter or per single family dwelling unit served by a master meter installation.

Effective July 1, 2006 \$21.00 per quarter per meter or per single family dwelling unit served by a master meter installation.

Issued: June 25, 2004	Signed: Hugh E. Grunden
Effective: July 1, 2004	Title: President

Effective July 1, 2007 \$24.00 per quarter per meter or per single family dwelling unit served by a master meter installation

b) Commercial or Industrial

Applicable to all installations:

Effective 7/1/2004 \$15.00 per quarter per quarter per non-residential unit.

Effective 7/1/2005 \$18.00 per quarter per quarter per non-residential unit.

Effective 7/1/2006 \$21.00 per quarter per quarter per non-residential unit.

Effective 7/1/2007 \$24.00 per quarter per quarter per non-residential unit.

**Rate Per Quarter:**

Effective 7/1/2004 \$0.1750 per 100 gallons

Effective 7/1/2005 \$0.2000 per 100 gallons

Effective 7/1/2006 \$0.2500 per 100 gallons

Effective 7/1/2007 \$0.3000 per 100 gallons

**Term Of Contract:**

Open order, that is, from quarter to quarter, except that when the service pipe is one (1) inch or larger, a contract for at least one year will be required.

**2. Out-Of-Town**

Applies only to existing connections in the area beyond the Corporate Limits of the Town of Easton.

**Customer Service Charge:**

a) Residential:

Applicable to all installations:

Effective 7/1/2004 \$30.00 per quarter per meter or per single family dwelling unit served by a master meter installation

Effective 7/1/2005 \$36.00 per quarter per meter or per single family dwelling unit served by a master meter installation.

Issued: June 25, 2004	Signed: Hugh E. Grunden
Effective: July 1, 2004	Title: President

Effective 7/1/2006 \$42.00 per quarter per meter or per single family dwelling unit served by a master meter installation.

Effective 7/1/2007 \$48.00 per quarter per meter or per single family dwelling unit served by a master meter installation.

b) Commercial or Industrial

Applicable to all installations:

Effective 7/1/2004 \$30.00 per quarter per non-residential unit.

Effective 7/1/2005 \$36.00 per quarter per non-residential unit.

Effective 7/1/2006 \$42.00 per quarter per non-residential unit.

Effective 7/1/2007 \$48.00 per quarter per non-residential unit.

**Rate Per Quarter:**

Effective 7/1/2004 \$0.3500 per 100 gallons

Effective 7/1/2005 \$0.4000 per 100 gallons

Effective 7/1/2006 \$0.5000 per 100 gallons

Effective 7/1/2007 \$0.6000 per 100 gallons

**Term Of Contract:**

Open order, that is, from quarter to quarter.

**3. Temporary Service**

Temporary service will be rendered only where the Commission has the necessary facilities available to render the service applied for without detriment to the service of other customers.

The rate for such service shall be \$0.6000 per one hundred gallons for all water used plus a service charge of \$30.00 per week of use.

The customer shall pay in advance the estimated cost of connections and disconnections including the cost of any material provided to render the service required that cannot be returned to the Commission's stores in their original condition less ordinary wear and tear.

Issued: June 25, 2004	Signed: Hugh E. Grunden
Effective: July 1, 2004	Title: President

#### **4. Liens**

All sums of money due and owing to the Commission for wastewater service rates and charges shall be and constitute a lien on the real property to or in which wastewater service is supplied. (Reference Article VI Section 17 Easton Municipal Code)

#### **5. Wastewater Contribution Permits**

a) Permit Fees:

A permit fee of \$250.00 will be billed and payable each quarter.

b) Surcharges:

Applicable when a permittee discharges wastewater with characteristics exceeding:

<b>Constituent</b>	<b>Concentration</b>
B.O.D.	250 mg/l
T.S.S.	300 mg/l
Oil & Grease	150 mg/l
Total Nitrogen	30 mg/l
Total Phosphorous	5 mg/l

The surcharge shall be calculated as follows:

1. The excess concentration (in mg/l) shall be determined from the quarterly average of self-monitoring reports submitted by the permittee, subject to verification by compliance monitoring.
2. The excess concentration shall be converted to lbs. by multiplying the excess (from 1.) by the million gallons of wastewater use (from the water meter readings) and by the conversion factor 8.34.
3. The surcharge shall be \$0.10 per pound.

Issued: January 10, 2002

Signed: Hugh E. Grunden

Effective: January 10, 2002

Title: President

## APPENDIX 1

### 1. Water Use Standards

for Calculation of Capital Charges for Non-Residential Properties

These Standards may be supplemented or amended from time to time by the President and/or CEO, subject to the approval of the Commission.

DESCRIPTION OF FACILITY	Standard
Adult Day Care	15 gpd/person
Airports (Passenger)	5 gpd/person
Alzheimer Unit (see Homes for the Aged)	75 gpd/per person
Assisted Living	75 gpd/per person
Camps Day Camps (No meals Served)	15 gpd/person
Camps Day Camps (Meals Served)	25 gpd/person
Children Day Care	15 gpd/person
Church	4 gpd/pew
Commercial Auto Dealership	0.078 gpd/sq.ft.
Commercial Bakery	0.15 gpd/sq.ft.
Commercial Banks	0.04 gpd/sq.ft.
Commercial Barber Shops	0.2 gpd/sq.ft.
Commercial Beauty Salons	0.35 gpd/sq.ft.
Commercial Carry Out (no seating)	0.2 gpd/sq.ft.
Commercial Car Wash (no shampoo)	1000 gpd/bay
Commercial Dry Goods Stores	0.05 gpd/sq.ft.
Commercial Gas Station w/ Car Wash	1750 gpd
Commercial Laundromats	3.66 gpd/sq.ft.
Commercial Mixed or Uncertain	0.18 gpd/sq.ft.
Commercial Office Buildings	0.09 gpd.sq.ft.
Commercial Real Estate Inc.	0.09 gpd.sq.ft.
Commercial Service Station	0.18 gpd/sq.ft.
Commercial Supermarkets	0.2 gpd/sq.ft.
Commercial Warehouses	0.015 gpd/sq.ft.
Country Club Baths	300 gpd/bath
Country Club Lavatories	100 gpd/lavatory
Country Club Showers	500 gpd/shower
Country Club Toilets	150 gpd/toilet
Country Club Urinals	100 gpd/urinal
Fire House (per person/per shift)	60 gpd/person/shift
Funeral Homes	500 gpd
Homes for the Aged (per person)	75 gpd/person

Issued: December 17, 2004	Signed: Hugh E. Grunden
